

Polar Bears

The polar bear are mammals, they are very big : they can reach 2 from 3 meters long and can weigh 400 at 600 kilogram. They are white and live in solitary. They can survive thanks to their fur. Polar bear hunt for survive, they hunt seal, walrus, fish and sometimes the beluga. Because of the melting of the ice the polar bear disappears. They are hunt by poachers, but now protect by ecologic people.
